The Retirement Board
City of Taylor Police and Fire Retirement System
Taylor, Michigan

Dear Board Members:

The purpose of the annual actuarial valuation of the City of Taylor Police and Fire Retirement System as of June 30, 2010 is to:

- Compute the liabilities associated with benefits likely to be paid on behalf of current retired and active members of the Retirement System,
- Compare accrued assets with accrued liabilities to assess the funded condition of the Retirement System, and
- Compute the City's recommended contribution rate for the Fiscal Year beginning July 1, 2011.

This valuation has been conducted in accordance with generally accepted actuarial principles and practices. Data concerning active members, retirees, beneficiaries and assets was provided by your staff. This data has been reviewed for reasonableness, but no attempt has been made to audit such information. The valuation was based on the provisions of the Retirement System as amended through June 30, 2010. The actuarial assumptions used in this valuation represent reasonable expectations of future experience under the System. This valuation has been prepared under the supervision of a Member of the American Academy of Actuaries who meets the qualification standards of the American Academy of Actuaries to render the actuarial opinions contained herein.

Respectfully submitted,

Denise M. Jones

Sandra W. Rodwan, M.A.A.A

Section One:
Valuation Summary

Purpose of Valuation

The purpose of the annual actuarial valuation of the City of Taylor Police and Fire Retirement System as of June 30, 2010 is to:

- ❖ Compute the liabilities associated with benefits likely to be paid on behalf of current retired and active members of the Retirement System,
- ❖ Compare accrued assets with accrued liabilities to assess the funded condition of the Retirement System, and
- ❖ Compute the City's recommended contribution rate for the Fiscal Year beginning July 1, 2011.

Liabilities and Funded Condition of Retirement System

Accrued liabilities of the Retirement System as of June 30, 2010 were computed to be \$150,774,376. The funding value of accrued assets was \$104,077,490. The ratio of the funding value of accrued assets to accrued liabilities was 69.0%.

Funding Value of Assets

A smoothed market value of assets was used for the June 30, 2010 valuation. This method, which spreads the difference between actual and expected investment return over five years, is unchanged from last year's valuation.

Computed City's Contribution Rate

The City's normal cost contribution rate was computed to be 22.00% of active member payroll (27.00% total normal cost less 5.00% member contributions). The unfunded accrued liabilities were amortized over 20 years as a level percent of future payroll. The amortization of the unfunded accrued liabilities was 23.04% of member payroll. The City's total contribution for the FY beginning July 1, 2011 was therefore computed to be 45.04% of member payroll.

Retirement System Experience

Experience for the year ended June 30, 2010 was less favorable than expected. The primary source of the unfavorable experience was the recognized rate of investment return on the funding value of assets which was less than assumed (0.9% vs. 7.6%). Partially offsetting the unfavorable experience were salary increases which were less than assumed.

Assumption and Method Changes

There were no assumption and method changes included in this valuation.

Benefit Provision Changes

There were no benefit provision changes included in this valuation.

Participant Data

	<u>06/30/2010</u>	<u>06/30/2009</u>
Active Members	143	151
Active Member Payroll	\$12,813,161	\$13,889,065

Section Two:

***Actuarial Calculations –
Funding***

Computed Contribution Rates for the Year Beginning July 1, 2011

The contribution rates shown below are expressed as level percents of active member payroll.

The normal cost can be viewed as the long-term on-going cost of the Retirement System. Unfunded actuarial accrued liability as of June 30, 2010 was amortized as a level percent of payroll over 20 years and added to the computed normal cost. The 20 year period is unchanged from last year’s valuation. The City’s total contribution rate has been computed to be 45.04% of payroll for the fiscal year beginning July 1, 2011.

	<u>Percents of Payroll</u>
Normal Cost	
Regular Retirement	24.21%
Pre-retirement Death	0.55
Disability	1.09
Withdrawal	<u>1.15</u>
Total Normal Cost	27.00%
Member Portion	5.00
City’s Computed Normal Cost	22.00%
Unfunded Actuarial Accrued Liability	23.04
City’s Total Contribution Rate	45.04%
City’s Dollar Contribution*	\$6,059,600

*Based on projected payroll.

Unfunded Actuarial Accrued Liability

	<u>June 30, 2010</u>	<u>June 30, 2009</u>
Actuarial Accrued Liabilities	\$150,774,376	\$146,368,393
Assets Allocated to Funding	<u>104,077,490</u>	<u>106,010,390</u>
Unfunded Actuarial Accrued Liabilities	\$46,696,886	\$40,358,003

Computed City Contributions

Comments and Recommendations

Comment 1: Experience for the year ended June 30, 2010 was less favorable than expected. The primary source of the unfavorable experience was the recognized rate of investment return on the funding value of assets which was less than assumed (0.9% vs. 7.6% assumed). Partially offsetting the unfavorable experience were salary increases which were less than assumed.

Recommendation: Retired life liabilities as of June 30, 2010 were computed to be \$97,973,402, and the Reserve for Retired Benefit Payments was reported to be \$95,711,850. The following transfer from the Reserve for Employer Contributions to the Reserve for Retired Benefit Payments is recommended in order to fully cover the retired life liabilities as of June 30, 2010.

Recommended Transfer	
To Reserve for Retired Benefit Payments	From Reserve for Employer Contributions
\$2,261,552	\$2,261,552

Section Three:

***Retirement System
Benefit Provisions***

Benefit Provision Summary

Service Retirement

Eligibility:

Corporal/Patrol and Fire: Any age with 20 or more years of service or age 60 regardless of service.

Police Command: Any age with 25 or more years of service or age 60 regardless of service.

Annual Benefit:

Corporal/Patrol:

Straight life pension equals 2.8% of average final compensation (AFC) times first 25 years of service, maximum of 70% of AFC.

Police Command and Fire hired prior July 1, 2007:

Straight life pension equals 2.8% of average final compensation (AFC) times first 25 years of service plus 1.0% of AFC times years of service in excess of 25 years to a maximum of 75% of AFC.

Fire hired on or after July 1, 2007: Straight life pension equals 2.25% of AFC times years of service. AFC will use base wages only and overtime is capped at \$3,000.

Average Final Compensation:

Highest 3 years out of last 10.

Deferred Retirement

Eligibility:

10 or more years of service.

Annual Benefit:

Computed as service retirement but based upon service, AFC and benefit provisions in effect at termination. Benefit begins at date retirement would have occurred had member remained in employment.

Duty Disability Retirement

Eligibility:

Payable upon the total and permanent disability of a member in the line of duty.

Annual Benefit:

To age 55: 50% of AFC.

At age 55: Same as Service Retirement Pension with service credit from date of disability to age 55.

Non-Duty Disability

Eligibility:

Payable upon the total and permanent disability of a member with 5 or more years of service

Annual Benefit:

To Age 55: 1.5% of AFC times years of service.

At Age 55: Same as Service Retirement Pension.

Duty Death in Service Survivor's Pension

Eligibility:

Payable upon the expiration of a worker's compensation to the survivors of a member who died in the line of duty.

Annual Benefit:

Same amount that was paid by worker's compensation.

Non-Duty Death in Service Survivor's Pension

Eligibility:

Payable to a surviving spouse, if any, upon the death of a member with 10 or more years of service.

Annual Benefit:

Fire: Spouse's pension equals 60% of the straight life pension.

All others: Accrued straight life pension actuarially reduced in accordance with an Option I election.

Death After Retirement Survivor's Pension

Eligibility:

Payable to an eligible surviving spouse, if any, upon the death of a retired member who was receiving a straight life pension which was effective July 1, 1975 or later.

Annual Benefit:

Spouse's pension equals 60% of the straight life pension the deceased retiree was receiving.

Member Contributions

5% of pay.

28		40	50			
29		40	50			
30		90	100			
31		40				
32		100				

Corporal/Patrol and Fire members are eligible for retirement with 20 years of service or after attaining age 60. All others are eligible for normal retirement with 25 years of service or after attaining age 60.

Lump sum factors: 17% of active member normal retirement liabilities for Police and 10% of active member normal retirement liabilities for Fire. These loads may need to be revised in the future based on emerging experience.

Actuarial Method Used for the Valuation

Normal Cost. Normal cost and the allocation of actuarial present values between service rendered before and after the valuation date were determined using an individual entry-age actuarial cost method having the following characteristics:

- ❖ The annual normal costs for each individual active member, payable from date of hire to date of retirement, are sufficient to accumulate the value of the member's benefit at the time of retirement;
- ❖ Each annual normal cost is a constant percentage of the member's year-by-year projected covered pay.

Financing of Unfunded Actuarial Accrued Liability. Unfunded actuarial accrued liability was amortized as a level percent of payroll over a 20 year period and added to the computed employer normal cost.

Active member payroll was assumed to increase 5.0% a year for the purpose of determining the level percent of payroll amortization payment.

Section Five:
Valuation Data

Asset Summary

As of June 30, 2010 the market value of assets was reported to be \$84,114,462. The funding value of assets (smoothed market value) was computed to be \$104,077,490.

GASB Statement No. 25 Supplementary Information

The information presented in the required supplementary schedules was determined as part of the actuarial valuations at the dates indicated. Additional information as of the latest actuarial valuation follows:

Valuation Date:	June 30, 2010
Actuarial Cost Method:	Individual Entry Age
Amortization method:	Level percent of payroll
Remaining amortization period:	20 years
Asset valuation method:	5-year smoothed market value
Actuarial assumptions:	
Investment rate of return	7.6%
Projected salary increases	5.0% - 8.0%
Includes inflation at	5.0%

Membership data as of June 30, 2010, indicated in Section Five of this report.

Analysis of Funding Progress

Valuation Date June 30	(1) Funding Value of Assets	(2) Actuarial Accrued Liability	(3) Percent Funded (1)/(2)	(4) Unfunded AAL (2)-(1)	(5) Annual Covered Payroll	(6) UAAL As a % Of Covered Payroll
